Boil Water Advisory Rescinded for The City of Coffeyville

TOPEKA, Kan. – The Kansas Department of Health and Environment (KDHE) has rescinded a boil water advisory for the City of Coffeyville public water supply located in Montgomery County. KDHE officials issued the advisory because of a loss in pressure in the system. Failure to maintain adequate pressure may result in a loss of chlorine residuals and bacterial contamination.

The Boil Water Advisory for the water utilities that purchase from the City of Coffeyville remains in effect.

Public water suppliers in Kansas take all measures necessary to notify customers quickly after a system failure or shutdown. Regardless of whether it's the supplier or KDHE that announces a boil water advisory, KDHE will issue the rescind order following testing at a certified laboratory.

Laboratory testing samples collected from the City of Coffeyville public water supply indicate no evidence of contamination and all other conditions that placed the system at risk of contamination are deemed by KDHE officials to be resolved.

###

KDHE's mission is to protect and improve the health and environment of all Kansans.
